FOREWORD

This most genuine dispersal sale of the entire **FOLEMILLFARM** Herd results from the decision by the Whitehurst family to split the partnership. As a consequence, this tremendous herd of cows has come onto the market.

The sale comprises 123 Cows and Heifers In-milk and In-calf, 27 In-calf and Served Heifers and 94 Youngstock together with a well bred Pedigree Black and White Stock Bull from the Overseal Herd of Messrs Marshall.

This is a superb opportunity to purchase from a herd that has been established for over 60 years where absolutely everything is right from the type and milk production to herd health. This is mainly due to the dedication of Richard Whitehurst and family.

These cows show strength in stature, with consistently tremendous udders and sound feet. This is completely substantiated by the high level of classification that has been maintained. As of today, 97 of the 123 milkers stand at Good Plus or better specifically comprising 19 Excellent, 46 Very Good and 42 Good Plus. A recent visit saw many increase in points and particularly worthy of mention is the fresh heifer Folemillfarm Evertrue 34 (Lot 123) who scored 85 points.

Most bulls used have been sourced from Semex Immunity Plus sires. Those featured include Monument Impression ET, Woodmarsh Lotto, Bosside Altaross ET, Crackholm Fever ET, Sandy-Valley-I Penmanship ET, Regancrest Altaiota ET, Gillette Windbrook and Far-O-La Devoted PI ET to name a few.

Plenty of youth features within the milking herd comprising 45 Heifers, 22 2nd, 25 3rd and 10 4th Calvers.

Superb herd health has been maintained which is detailed in the letter below from the Whitehursts long standing vet Emma Crust of Glenthorne Vets.

The Whitehursts have for many years participated in the Staffordshire Agricultural Society Competition (Uttoxeter Area) maintaining regular successes, most recently winning the best Herd and Youngstock title in 2018.

These cows are milky whilst also consistently producing excellent milk quality.
The herd average for the current year is running at

8649kg 4.44%F 3.37%P

The cows are currently averaging **26.9kg daily** with the latest bulk sample showing **4.65%F 3.39%P cc163**.

This is a really exciting chance for both pedigree and commercial producers to purchase some fantastic cows and youngstock. Attendance is a must on Thursday 3rd October.

VETS LETTER

The Folemillfarm herd has been tested for Johnes every 3 months since June 2016 and has only had a low level of amber/red cows, with a Johnes control plan in place to manage these cows, aiming to eradicate the disease. At the last test carried out in May 2019 all of the cows were clear (green) with only one cow being classed as amber.

The herd has been vaccinated annually for leptospirosis since January 2008 with the last booster given on 12/12/2018.

IBR vaccination has been used since January 2012, with all heifers given a live vaccine followed by an inactivated vaccine and annual inactivated boosters are given, with the last booster being administered on 27/11/2018.

BVD has been managed with good biosecurity and previous testing has shown the herd to be free from BVD. A recent bulk milk antigen test has been carried out with results announced on the sale day.

All calves are vaccinated with Rispoval 4 and Rispoval Pasteurella.

For further information please contact Emma Crust at Glenthorne Vets on 01889 567200.
